# Responsive Web Design

A responsive web design is a solitary website that acclimates to the apparatus of every exceptional device, if desktop, cell phone, tablet or television screens.

## Usability and Interface Designing

Usability is a key factor when designing websites. A user friendly website attracts visitors repeatedly. We exercise our imagination and use our professional skills to impart usability to your website. We excel in designing high quality and business oriented websites.

Our experienced team follows a set approach to ensure we give you the best design that speaks out for itself and scores well on usability and professionalism. Our designs are done keeping in mind your target audience and your business purpose. We make sure all our designs are compatible with all the browsers and are perfectly

Validated with W3C. Our designers are proficient in Photoshop, Flash, HTML, CSS, XHTML and Web 2.0 standards.

We understand the fact that the website we create is the window for your customers to know about your organization. Customers will assume that if your website looks cheap, your products and services will also be.

We believe in designing an uncomplicated and consistent navigation system, clear & concise layout amongst others.

It may be possible to attract visitors if you have an eye-catching design, but content & ease of navigation is what keeps them glued to the site and browse without any issue. We make it easy for your customers to find what they are looking for on your website.

We have a well laid out process to any design.

- Understand/Learn: Our team spends time to understand your business, customers & competition.
- Wireframes: Our designers sketch rough layouts to depict how the website will be laid out & structured to make most sense to your customers.

## Web Development

Website Design & Development takes proper research and strategy. Our aim is to provide well designed and SEO friendly website at affordable prices.

In tandem with web design, web development plays a vital role in your business site success. While web design covers the graphics and layout of your site, web development is the core coding that holds your web applications together. Strong web development bolsters your web design so that you have error-free loading pages and a flexible web structure to support an expanding business. Rainiersoft Technologies provides web design and web development rooted in creativity and founded in technical expertise.

Delivering advanced web applications is exactly what we do!

With more than 15 years' experience in designing, developing and supporting web applications and Rainiersoft is the reputable and reliable "one-stop" vendor to realize you're most ambitious and complex projects.

With Rainiersoft you get:

- Functional and highly usable web applications matching your business needs, requirements and expectations.
- Smart and open application architecture allowing for high solution productivity and scalability.
- High application maintainability enabling to reduce the total cost of ownership.
- Full control and transparency of the development process backed with seamless communication.
- Mature QA procedures throughout the entire software development life cycle.
- Deployment, stabilization and ongoing support & maintenance of the delivered application.
